

PCB Separator MAESTRO 3E

MAESTRO 3E separates both small and large pre-scored PCBs. The table and the rest can be continuously adjusted to the most suitable working position. The slit between the linear blade and the rest can be adjusted to ensure that the side strips fall through and are sorted out.

Safe Operation

The PCB is placed with its pre-scored groove onto the linear blade and the circular blade is then drawn by hand across the PCB. The clearance between the upper guide and the linear blade is adjustable to ensure that the PCB is only separated in the pre-scored groove.

Technical Data	
Separation type	Component side Solder side circular blade linear blade
Operation	by hand
Separation length	max. 450 mm
Material	FR4, Aluminum
Temperature/ Humidity	Operation +10 - 35°C / 10 - 85% Storage -20 - +50°C / 10 - 85% Transport -20 - +50°C / 10 - 85%
Weight	22 kg
Dimensions H x D x W	455 x 700 x 350 mm
Approvals	CE, FCC class A

Maximum height of components next to the groove.	
Increase in external dimensions after separation.	typical 0.2 mm
The pre-scored grooves can be interrupted by cutouts with a length of up to approx. 5 mm.	
If components project above the groove, the linear blade needs to be cut out. In such a case contact us.
